

I am a devout listener of K-Love radio on the FM dial in my local community here in Santa Rosa, California. I also enjoy being able to tune in to K-Love almost everywhere I go, since it is available in so many parts of the country. When I tune in to K-Love, I know that I will hear only wholesome, Christian, family-values-oriented music and commentary. Having K-Love Christian radio available as a listening alternative for the public is critical. As a regular listener of this station for the past several years, and a financial supporter of the station for the past year, I would personally be devastated to see this invaluable public service taken away. The Christian music alternative, as well as the morals and values expressed on this station, are woefully undervalued and sorely lacking in today's society. K-Love provides an extremely important service to the local community as well as the entire country. It should not be displaced by an LPFM broadcaster providing other programming. Please do not allow LPFM stations to take priority over current FM translators. The availability of K-Love to the general public all over the country is absolutely critical and should not be threatened or impaired in any way.

Thank you for your time and attention to this important matter.

Sincerely,

Lisa A. Scorallo
